

## Swimming Pool Certification Inspection Agreement

By completing this form you agree to have our Certifier inspect your swimming pool for compliance with NSW legal requirements, at a time to be agreed.

You will be issued with either a Certificate of Compliance, or a Certificate of Non-Compliance.

If the pool does not comply, we will provide a report listing the areas of non-compliance so that you can identify items not currently meeting the required standards.

**The charge for the first inspection is \$255 inc GST. This includes any reports and all certificates as required. Any subsequent inspection will cost \$145 inc GST.**

During the course of our inspection, our inspector will take a number of digital images. We may also apply strength tests to parts of the barrier to ensure they comply with the code. We will certainly walk into garden beds, maybe the house, and other areas around the pool to measure or record aspects of the safety barriers. We are not liable for any damaged caused by our access or tests.

If we issue a Certificate of Non-Compliance and do not subsequently re-inspect the pool and issue a Certificate of Compliance, within six weeks of the initial inspection, we are required to notify your local Council of the fact. If the property is for sale, Council may choose to allow the non-compliance to continue until after the property is sold but it is under no obligation so to do.

**I confirm I agree to have the swimming pool inspected for compliance.**
